

BIO PROFILE CRAIG DAVIDSON

INFRA CYCLE FISCAL SOLUTIONS

Dedicated to Improving Your Municipality's Fiscal Performance!

Craig Davidson is a Senior Associate with InfraCycle Fiscal Solutions. Craig couples his eighteen years as an Auditor and Financial Advisor specializing in smaller rural municipalities and social housing with his eight years as the Chief Administrative Officer and Treasurer to provide solutions with InfraCycle Fiscal Solutions.

In his public accounting career Craig has helped clients move from a purely manual cash accounting system to integrated computer systems including staff training, to make the transition virtually seamless and pain free. Craig was the 'go-to' guy for social housing from the capital phase through to operations with a solid understanding of the different reporting requirements in each phase. During this time, Craig prepared and delivered a workshop entitled, 'The Role of the Municipal Councillor', and participated in client training for GST and the new municipal tax realities that started in Ontario in 1998.

During his years at the Municipality of Hastings Highlands, Craig introduced capital cost forecasting, multi-year budgets and responsible debt practices into everyday operations and the Municipality has grown into a responsible government, regardless of its size.

A natural progression from capital forecasting, Craig is involved in Asset Management Training and worked with the Ontario Good Roads Association to develop and present "Public Accounting Fundamentals for Asset Management" as part of their Asset Management Academy which welcomed their first students in the Fall of 2012.

Craig has made presentations on budgeting – both capital and operating, preparing your own Financial Information Return, and Asset Management from a small municipality perspective and has shared his asset management experience and views during the Asset Management Course at Road School hosted by the Ontario Good Roads Association.

"InfraCycle Fiscal Solutions provides a wealth of information and assistance to Municipalities and Economic Development Corporations that support economic development and long-term planning including a comprehensive budgeting analysis. The Smooth Rock Falls Economic Development Corporation believes that the services and products offered through InfraCycle Fiscal Solutions are of value and importance to Municipalities and Organizations that are currently engaged in development projects, fiscal planning initiatives or any other activities that lead to economic development or long-term planning."

James Bernardi, Former Director of Economic & Community Development, Smooth Rock Falls Economic Development Corporation, Smooth Rock Falls, ON
